

Net Stable Funding Ratio

Qualitative Disclosures

Pursuant to the RBI guidelines on NSFR dated May 17, 2018, the Bank has adopted and complied with the Basel III standards pertaining to NSFR from October 01, 2021. NSFR aims to improve the resilience of banks by promoting long-term funding stability. It mandates banks to maintain a stable funding profile vis-à-vis the composition of their assets and off-balance sheet activities. It reduces the probability of erosion of a bank's liquidity position due to disruptions to its regular sources of funding. The NSFR guidelines of RBI stipulate the applicable Required Stable Funding ("RSF") factor for each category of asset and Available Stable Funding ("ASF") factor for each type of funding source. NSFR represents the ratio of the bank's ASF to RSF. The breakdown of the bank's ASF and RSF amounts after applying the respective ASF or RSF factors are provided in the "weighted amount" column of the NSFR disclosure format. The Available Stable Funding (ASF) is primarily driven by the total regulatory capital as per Basle III Capital Adequacy guidelines stipulated by RBI and deposits from retail customers, small business customers and nonfinancial corporate customers. Under the Required Stable Funding (RSF), the primary drivers are unencumbered performing loans with residual maturities of one year or more, excluding loans to financial institutions. Under ASF, the major source of funding for the Bank is retail deposits. The Bank does not rely on interbank borrowings. However, long term refinance from SIDBI, NABARD and NHB is availed against eligible loan assets. The Bank has been following retail deposit led funding strategy consistently over a decade.

The following table sets out NSFR of the Bank as on September 30, 2023:
